

# IN LIVING COLOR

## Rodney Gentry Master Stylist & Color Specialist

When it comes to your hair, even the slightest change in color can go a long way to transforming your look and style. You may want to change up your base color with a warmer tone of caramel, chocolate brown or buttery blonde or a cooler hue of champagne, copper or platinum. Highlights can brighten up your complexion and lowlights can enhance your skin tone and eye color. Whatever hair color process you choose, it should complement your natural facial features to give you the best results.

With so many colors and techniques to choose from, it's a good idea to discuss hair color ideas with a professional. Renowned hair designer and top hair colorist, Rodney Gentry of Scottsdale's elite Sachi Salon and Spa, is an expert in innovative hair color techniques. Gentry offers his clients personal hair color consultations to determine the most flattering hair color ideas to fit their own unique style. Call Rodney to make an appointment to learn about the best hair color ideas for you today.
